

3GPP Network Camera

The VIVOTEK IP7131/7132, incorporating our self-developed VVTK-1000 SoC processor, offers superior quality MPEG-4 videos at 30 fps in full VGA resolution, and gives viewers image clarity and transmission efficiency that was once impossible. It comes with 3GPP compatibility; a new ability allowing users to monitor cameras from not only standard web browser or application software, but also 3G cellular phones anytime, anywhere. What mainly differs IP7131 and IP7132 is that IP7131 supports built-in IEEE 802.3af-compliant PoE (Power over Ethernet) function while IP7132 supports a 802.11g wireless LAN connection. More features are enhanced in IP7131 and IP7132 to meet specific, versatile applications such as digital I/O interface, built-in PoE, and appropriate lens selection with CS-mount.

IP7131 / IP7132

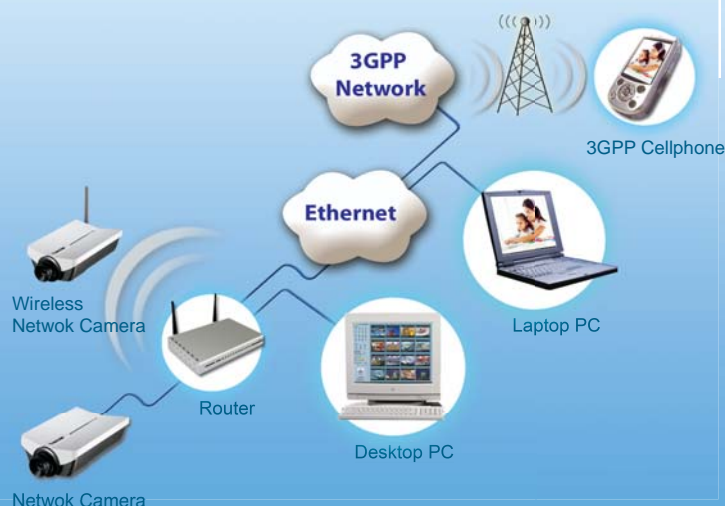

Features

- Real-time MPEG-4 compression in VGA resolution
- Built-in Power over Ethernet (PoE) (IP7131)
- Built-in 802.11b/g WLAN (IP7132)
- Support 3GPP mobile surveillance
- Digital I/O for external sensor and alarm
- Free-bundled 16-channel recording software
